# AI2Connect GmbH

AI2Connect is a German "factory for AI agents" that help logistics companies scale operations without increasing headcount. Our agents do not replace people; they relieve them of repetitive work and support better decision-making.

Our two flagship AI agents demonstrate this approach in practice:

**AI2OrderAgent** automatically reads incoming freight requests from emails, extracts all relevant information, and generates complete price quotations within seconds — eliminating manual data entry and reducing response times dramatically.

**AI2RampOptimizer** coordinates loading docks and truck schedules across multiple warehouses simultaneously, reducing waiting times, improving resource utilization, and lowering logistics costs by up to 30%.

AI2Connect has been recognized as "Best in Intralogistics" and nominated for "Startup of the Year" at the IFOY Award 2026, one of the most prestigious awards in the logistics industry.

Our AI agents integrate with existing systems within weeks, not months. Made in Germany. GDPR-compliant. Data never leaves the European Union.

# BasePeak GmbH

**BasePeak GmbH** is building the collaborative workspace where humans and AI agents work together – seamlessly, securely, and sovereign. The company offers two integrated products: **BasePeak.AI**, an agentic AI platform that enables organizations to build secure AI agents without code, and **BasePeak.WORK**, a fully integrated European collaboration workspace covering mail, files, chat, video, calendar, and project management.

BasePeak.AI features intelligent model routing, sharable agents and knowledge bases, and a built-in security barrier to keep sensitive data protected. BasePeak.WORK provides a sovereign, open-source collaboration environment that can be provisioned for 500+ users in under five minutes, with AI agents integrated directly into daily workflows.

Together, the two products deliver a fully integrated, GDPR-compliant platform for Europe's public sector and SMEs that need both AI capability and data sovereignty.

## Chatdok GmbH

Chatdok is an AI-native health company building continuous, preventive cardiovascular care infrastructure powered by multimodal AI and intelligent agents. Chatdok closes the episodic chronic care gap with an AI platform that integrates wearable, clinical, imaging, and patient-reported data to predict and prevent cardiovascular events before they happen.

Its flagship solution, Chatdok-Heart, combines real-time monitoring, explainable AI, and multimodal predictive analytics to deliver 7-day risk forecasting and personalized interventions. Beyond patient applications, Chatdok develops custom AI agents for hospitals, insurers, and enterprise partners — enabling automated patient engagement, image analysis, clinical decision support, and post-discharge care at scale.

With over 1M patient interactions across 20+ countries, strong retention, and a €1M German government-backed clinical validation program, Chatdok is positioned as a scalable AI infrastructure layer for next-generation healthcare systems.

# Geotech Infoservices Deutschland GmbH

Geotech is a 24-year-old software solutioning group with deep experience serving EU clients since inception. Founded as an German-Indo JV, it served as the technical arm of INVERTO AG (now a BCG company) for its first six years, solely developing the award-winning e-procurement platform e-contor. It was adopted by leading German enterprises including PLUS, OBI, Sandoz, Villeroy & Boch, and Netto, and was recognized with the 2004 Microsoft RAD Award for excellence in supply chain innovation.

Since becoming independent in 2008, Geotech has grown into a trusted software development and resourcing partner for organizations of all sizes. Our client engagements span custom mobile and web solutions as well as extended development teams — several EU clients have partnered with us continuously for 10–18 years.

Operating from a central delivery hub in India, Geotech has established regional presence in the UK, Denmark, and Germany. In the coming years, we plan to strengthen our EU entities further and expand our services globally.

## Kauz GmbH

Kauz.ai is the European all in one AI platform that enables SMEs and public administration to use AI immediately, securely, and cost effectively, without US cloud dependence or hidden costs, with tailored pricing and GDPR compliant hosting in Europe.

The platform combines all relevant AI tools in one solution. aiWorkplace is an AI assistant for everyday work — writing, summarizing, knowledge retrieval, image generation. aiWorkflows automates business processes without code. aiStudio enables organizations to build, customize, and operate their own AI chatbots and voicebots, with editorial control to ensure hallucination free results.

Founded in 2016 by Thomas Rüdél in Düsseldorf, Kauz.ai was an early OpenAI beta partner and the first chatbot provider in the DACH region to integrate ChatGPT in March 2023. Over 300 AI projects have been delivered, with answer accuracy rates above 97 percent.

Customers include R+V Insurance, Deutsche Familienversicherung, LBS, WSW, Wien Energie, ias Group, the cities of Cologne and Düsseldorf, the district of Warendorf, as well as universities and industrial companies.

Beyond the platform, Kauz.ai offers personal support and industry expertise through its partner network.

# Kompetenznetz Logistik.NRW

We are logistics! - We are NRW! - We are your network!

For the “Kompetenznetz Logistik.NRW”, the LOG-IT Club e.V. has joined forces with the “Verband Verkehrswirtschaft und Logistik NRW” as a supporting association. The project is funded by the Ministry of Economic Affairs, Industry, Climate Protection and Energy of the State of NRW.

The goal is to bundle the competencies in and around the logistics industry in NRW and to support the industry in the upcoming structural change. The activities are open to all companies that (just like us) identify with NRW and are interested in the further development of logistics, innovations and digitalization, as well as our network.

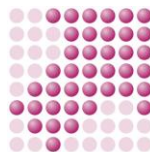

Active support of the network is possible through membership in the LOG-IT Club e.V. - currently, nearly 450 companies and institutions are already actively participating as members. If you would like to become a member of our network or need information, please contact Peter Abelmann ([p.abelmann@logit-club.de](mailto:p.abelmann@logit-club.de)).

We want to actively shape and further develop NRW as the No.1 logistics location in Europe through innovation and networking activities.

## RoboFinder UG

We make service robotics accessible.

RoboFinder is a digital comparison and AI-driven matching platform for professional service robotics. We help companies navigate a fragmented and fast-growing robotics market to identify the right solution for their specific use case, operational environment, and budget.

In sectors such as healthcare, facility management, logistics, and industry, automation projects often fail not because of the technology itself, but because decision-making is complex, market transparency is limited, and vendor landscapes are difficult to evaluate.

RoboFinder supports operations, procurement, and innovation teams in identifying, comparing, and evaluating automation opportunities more efficiently. By combining structured market intelligence with data-driven matching, we help reduce complexity and accelerate implementation.

Our platform focuses on use cases such as cleaning and intralogistics and collaborates with leading international robotics manufacturers and local integration partners to merge business needs with practical automation solutions.

We are launching at GITEX Europe and look forward to connecting with companies, partners, and innovators shaping the future of practical AI, automation, and commercially deployable robotics.

RoboFinder – Service Robotics Decisions, Made Simple.

# Solid Hour Software GmbH

We build custom enterprise and AI software for organizations where data privacy, operational resilience, and regulatory compliance are non-negotiable — purpose-built for defense contractors, public authorities, and regulated industries.

**What We Do** We audit your existing software landscape to eliminate redundancy and connect siloed systems. Where gaps remain, we build purpose-specific tools with custom AI workflows that fit your processes exactly.

**Infrastructure & Data Sovereignty** Fully deployable on-premise or on air-gapped, client-owned systems. Compatible with BSI-C5-certified, GDPR-compliant German cloud providers. Zero US dependencies, zero data egress — architecturally guaranteed.

**AI Platform** Our modular platform covers secure AI communication, video conferencing, document search, meeting protocols, database access, and workflow automation. A central authorization layer enforces multi-tenant governance across organizational, user, and AI levels, with full audit trails and built-in EU AI Act and GDPR compliance. No AI action executes without explicit authorization.

**Licensing** Perpetual module licenses. One-time purchase — no SaaS, no subscriptions, no vendor lock-in.

# Wirtschaftsförderung Wuppertal AöR

Wirtschaftsförderung Wuppertal is the public economic development agency of Wuppertal — a city of 360,000 in the heart of the Rhine-Ruhr metropolitan region, home to corporates like Bayer and Vorwerk, world-class clusters in materials, health, digital technology and automotive, and a growing startup scene.

Our Start- & Scaleup Unit is the dedicated entry point for founders looking to land, grow or connect in the Bergische Region. We act as connector and ecosystem orchestrator — bringing together startups with corporate partners, investors, university and the city's key institutions under one roof.

Whether you're looking for your first customer, a corporate pilot partner, lab space, talent or simply the right introduction: we open doors. Our network spans local anchors like the w-tec and Circular Valley as well as the wider "Bergisches Land".

Wuppertal is less than 30 minutes from Düsseldorf and Cologne — and far less crowded. Come find out why more founders are choosing to build here.

# Wisdom Bridge AI GmbH

Wisdom Bridge is an AI platform for goal-driven conversations between humans and AI avatars.

Our proprietary, patent-pending quality framework and Dialog OS deliver better outcomes than most human-led conversations in terms of efficiency, consistency, and actionable outcomes.

Customers use our no-code platform to design and conduct conversations for solving real business problems - such as knowledge capture and transfer, stakeholder interviews project and product management, and structured employee surveys and reviews - at scale.

# NRW.Global Business GmbH

Invest in North Rhine-Westphalia, expand worldwide:  
The state-owned foreign trade promotion agency NRW.Global Business is the partner for all companies when it comes to investment projects and settling in North Rhine-Westphalia, developing growth markets and networking with international business partners. As Germany's leading business location, the state is in demand among foreign investors worldwide and is also home to numerous companies with global growth potential.

NRW.Global Business conducts international location marketing for Germany's No. 1 investment location, North Rhine-Westphalia, and promotes foreign direct investment here worldwide. The experts at NRW.Global Business support investors in tax and legal matters and provide detailed information on the economic structure and industry clusters. They analyze investment plans, identify suitable locations and accompany an investment project from the first step to successful settlement and beyond.

Trade fairs abroad offer perfect access to new markets and a broad professional audience. NRW.Global Business helps companies to present their products and services here in the best possible way – via joint company stands, information service centers or small groups. The company also organizes and coordinates delegation trips and trade missions to growth markets. Numerous other sector information and cooperation events organized by NRW.Global Business offer companies additional support in setting up and expanding their foreign business.
